Art Unit: 3745

#### **DETAILED ACTION**

## **Drawings**

The drawings are objected to because "apper level" should be --upper level-- (Figs. 2, 6); "gydroturbine" and "gydroturbine" should be --hydroturbine-- (Figs. 7, 8). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

# Specification

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter. Further the specification includes several misspellings

Art Unit: 3745

including: "gydroturbine" should be --hydroturbine--; "cilindre" and "cylinder" should be --cylinder--; and "entake" should be --intake--.

## Claim Objections

Claims 1 and 2 are objected to because of the following informalities:

Claim 1, Line 1, "Power-Station" should be --power-station--,

Claim 1, Line 1, "." should be --,--,

Claim 1, Line 5, "for" should be --to--,

Claim 1, "entake" and "entakes", all occurrences should be --intake-- or --intakes--, respectively,

Claim 1, "gydroturbine", all occurrences should be --hydroturbine--,

Claim 1, Line 9, "produses" should be --produces--,

Claim 2, "cylindre", all occurrences should be --cylinder--,

Claim 2, Line 6, "closet" should be --closed--,

Claim 2, Line 7, "openned" should be --opened--,

Claim 2, Line 13, "the special net" should be --a net--,

Claim 2, Line 15, "entake" should be --intake--.

Appropriate correction is required.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3745

Claims 1 and 2 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim 1 recites "by pipes" in lines 4, 16, and 19, and "by pipe" in lines 7 and 11, these recitations make the claim indefinite in that it is unclear whether the different recitations of "pipes" and "pipe" are the same or a different. Distinctions should be made in the recitations such as --a first plurality of pipes-- and --a second plurality of pipes--, as well as, --a first pipe-- and --a second pipe--.

The recitation of "Wherein the people ... waves." after claim 1 is improper in that a claim includes only one sentence, and that it recites the alleged merits and applications of the invention, and thus should be deleted.

Art Unit: 3745

It appears that claim 2 is dependent on claim 1, but does not refer back to claim 1. Line 1 of claim 2 should contain a reference to claim 1 such as: --The wave's power-station of claim 1, wherein said wave's pump consists of--.

The term "high" in claim 2 is a relative term which renders the claim indefinite. The term "high" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The size of the cylinder is rendered indefinite.

The recitation of "Said cylinder ... of waves." after claim 2 is improper in that a claim includes only one sentence, and does not further limit the claim, and thus should be deleted.

## Allowable Subject Matter

Claims 1 and 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

#### Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 4398095, 4883411, and 5975865 each disclose wave power stations having pumps driven by wave motion to pump fluid from a body of water to a reservoir from which it is delivered to hydroturbine that drives a generator and further include filtered in takes, but do not

Art Unit: 3745

teach the inclusion of wave driven air pumps that pump air to tanks from which air is delivered

Page 6

to clean the filter beds of the water pumps. 4822486 discloses a self-cleaning filter.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michael Leslie whose telephone number is (571) 272-4819. The

examiner can normally be reached on M-F 8:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Edward Look can be reached on (571) 272-4820. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
